

Meetaweetaak o Tic-Tac-Toe!

Let's Play Tic-Tac-Toe!

Number of players: 2

Requires: 10 tokens (5 each of two colours)

-or- place game board in a page protector and use a dry-erase marker

Object: Players take turns marking one space at a time, trying to get three in a row.

In order to claim your space you need to say the corresponding word or sentence in Michif that matches the picture on the space.

In the game pictured to the right, The pink X player would like to claim the top left spot. In order to put their token there they would need to say "Yootin!" to correctly identify which weather is represented in that square.

If they get it correct they can place their token. If they are incorrect then the other player has a chance to steal the space by guessing correctly.
